ANNOUNCEMENT**~ Selected for the "Global Top 100 Geospatial Companies 2026" ~**

Kokusai Kogyo Co., Ltd. is pleased to announce that it has been selected for the "Global Top 100 Geospatial Companies 2026," an annual list recognizing the world's leading geospatial organizations.

The Global Top 100 Geospatial Companies list, curated by Geoawesomeness* since 2016, highlights 100 companies worldwide that leverage geospatial data and technologies to solve critical challenges. To mark Geoawesomeness's 15th anniversary, the 2026 edition moved away from the traditional small expert panel, adopting a community-led evaluation process involving over 125 geospatial professionals from across the globe. The resulting list recognizes 100 premier organizations—ranging from established industry leaders to fast-growing scale-ups—pioneering fields such as foundation models, Earth observation (EO) analytics, 3D mapping, spatial digital twins, mobility intelligence, and climate and sustainability solutions.

This marks Kokusai Kogyo's second selection for the prestigious list, following its initial inclusion in the 2023 edition (published in March 2023).

Kokusai Kogyo delivers services grounded in robust geospatial information technology developed over many years. Guided by its corporate mission to "Create a World to Hand Down to the Future Through Spatial Information", Kokusai Kogyo will continue to leverage geospatial technologies to contribute to the realization of a sustainable society.

*Geoawesomeness: The world's largest geospatial media platform and global community, specializing in location-based technologies, Geographic Information Systems (GIS), and remote sensing.
